

" Ben FAX 202-225-4458
see change in part of Nov 2.

Amend Sec. 207(a) to add the following sentence.

" When granting either an exclusive or partially exclusive license, the Federal agency shall retain a Non-exclusive, Non-transferrable, Inalienable, Paid-up license to practice or have practiced the licensed invention for or on behalf of the United States throughout the world and may obtain additional rights to sublicense any foreign government or international organizational or treaty or international agreement." (existing)?

Ben - comment - note that this covers only exclusive or partially licenses as conventionally such license is not reserved for non-exclusive licenses. Further, " the treaty or international agreement" is presumed to be existing at the time of licensing and is not intended to cover "Future" treaties or agreements.

WJ 262-
225-3121

Amend Sec. 207(a) to add the following sentence.

When granting either an exclusive or partially exclusive license the Federal agency shall retain a Non-exclusive, Nontransferable, irrevocable, paid-up license to practice or have practiced the licensed invention for or on behalf of the United States throughout the world and may obtain additional rights to sublicense any foreign government or international organization if the licensed inventor is required by treaty or international agreement.

Ben - comment - note that this covers only exclusive or partially exclusive as conventionally such license is not reserved for Non-exclusive licenses, for then "the treaty or international agreement" is presumed to be existing at the time of licensing and not intended to cover "future" treaties or agreements.

Ben - you wanted this before
2:00 — I have way to
Fix (b) (4) — strike
"a research license" and insert
thereby "the licensing of ~~un~~ patented
potential therapeutic materials"
