- **Final oral exam** – maximum of 50 points
passing mark is given after cumulative acquisition of 51 points /i.e. exam cannot be passed only with maximum points after both colloquiums, but one has to take oral exam too/
Intellectual property Law consists of teaching Authorization Law and Industrial property. Several steps in teaching this subject are as follows:

- Introduction in basic notions and development
- About authors' products and persons protected by Authorization Law
- Subjective Authorization Law, scope and nature
- Judicial turnover and protection of Authorization Law
- Related Authorization Laws
- Patent law as a Law of Industrial
- Related Patent Laws
- Protection Design Law
- Brand Law
- Country of Origin Law
- Judicial turnover and protection of Industrial property Law
- Competitor Law
II part - NOTES ON PROCESS OF TEACHING INTELLECTUAL PROPERTY

- The course book consists of 500 pages with additional law regulations.

- The time envisaged for this subject is 50% than previous program but the content remained the same.

- Additional problem lies in the fact that this subject is worth 2 ECTS credits in the faculty program.
Consequently...

Faculty of Law has intentions to allocate 4 or 5 ECTS credits to this subject after next reaccreditation. This will be great motivator for students since the number of the credits and time for studying this subject are not in balance.

✓ the polls among students emphasize this disbalance as the main weakness when it comes to the status of this subject at our faculty.
The trend at Faculty of Law should be emphasized >

only 20% of students per year decides to attend the courses offered by this branch of law. That’s why it is enormously important that Faculty of Law in cooperation with other institutions (organizations) gives more importance to this branch of law. In this process of subject (area) promotion key role could be played by national and international experts in the area of intellectual property law!
